IDENTIFIERS Educational Resources Information Center; National Advisory Council for Career Education; Office of Career Education; United States

ABSTRACT

Focusing on the career education literature that emerged from 1973 through 1978, this bibliography concentrates on (1) a special series of Monographs on Career Education issued by the United States Office of Education (USOE), Office of Career Education, (2) the general publications on career education issued by the USOE Office of Career Education, (3) publications on career education issued by the National Advisory Council for Career Education, and (4) publications and reports from career education projects supported by the USOE Office of Career Education. In addition to the 252 references listed in these areas, a final section contains a selection of literature (208 citations) from the remainder of the body of career education literature. All items in the bibliography have been processed by the Educational Resources Information Center (ERIC) and are available to the public through the nationwide ERIC system. (LRA)

DISCRIMINATION PROHIBITED

Title IX of the Education Amendments of 1972, Public Law 92-318 states:

> "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance."

Title VI of the Civil Rights Act of 1964 states:

> "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of or be subjected to discrimination under any program or activity receiving Federal financial assistance."

Section 504 of the Rehabilitation Act of 1972 states:

> "Any program or activity which receives Federal financial assistance 1) may not exclude qualified handicapped persons from aids, benefits or services; 2) must provide equal opportunity to participate or benefit; 3) must provide services as effective as those provided to the nonhandicapped; and 4) may not provide different or separate services except when necessary to provide equally effective benefits."

Therefore, any education program or activity receiving Federal financial assistance, or part of a larger entity which receives Federal financial assistance, must be operated in compliance with these laws.

INTRODUCTION

In May of 1973, we prepared a publication entitled Bibliography on Career Education. In the "Introduction" to that publication, we said: "The period from 1965 to 1972 saw the emergence of numerous journal articles and documents which were related to the type of educational program now referred to as career education. This bibliography cites some of the more significant of these articles and documents. . . .It is hoped that this bibliography will be useful to persons interested in familiarizing themselves with the career education concept and with some emerging techniques for the implementation of career education programs."

The 1973 bibliography seemed to meet a need in its time. It was widely distributed and went through three successive printings. It was also entered into the ERIC Collection, where it is still available to the public under the accession number ED-079-554.

However, much has happened in the field of career education since the issuance of the 1973 bibliography. In Section 406 of the Education Amendments of 1974 (Public Law 93-380), the Congress called for: (1) the establishment of an Office of Career Education in the U.S. Office of Education to serve as the focal point for USOE's career education efforts and to provide national leadership in career education, and (2) the creation of a National Advisory Council for Career Education to advise the U.S. Commissioner of Education on the implementation of career education and to make recommendations to the Congress concerning further career education legislation. In the same piece of legislation (Public Law 93-380), the Congress authorized special funds for the U.S. Commissioner of Education to use for supporting demonstration projects in career education during a four-year period (Fiscal Year 1975 through Fiscal Year 1978).

Based on the experience with the demonstration projects and on the recommendations from the National Advisory Council for Career Education, the Congress enacted the Career Education Incentive Act (Public Law 95-207), which took effect in Fiscal Year 1979. Under the Career Education Incentive Act, Federal funds are allotted to State Departments of Education on a population formula basis, to assist the State Departments of Education in the further development and implementation of career education in the elementary and secondary schools of each State.

These Federal efforts have served to stimulate and supplement the substantial State and local efforts in career education and have helped to provide a focus and coherence for the national career education movement. The combined Federal, State, and local efforts have been reflected in a very large increase in the literature on career education since 1973. It has seemed to us, therefore, that there is now a need for a new bibliography to deal with the large body of career education literature that has come into being during the past six years. Such is the purpose of this present publication.

Whereas our 1973 Bibliography on Career Education (ED-079-554) dealt with the career education-related literature that emerged during the period from 1965 to 1972, this new 1979 Bibliography on Career Education focuses on the literature that emerged from 1973 through 1978. Thus a person interested in reviewing the long term growth and development of career education would need to consult both of the bibliographies.

Because of the large amount of career education literature to be dealt with, no bibliography of the size of this present one could pretend to be complete and comprehensive. Given the limitations which we faced, both in terms of time available and in terms of size of the bibliography, we decided to concentrate our attention on: (1) a special series of "Monographs on Career Education" issued by the USOE Office of Career Education, (2) the general publications on career education issued by the USOE Office of Career Education, (3) publications on career education issued by the National Advisory Council for Career Education, and (4) publications and reports from career education projects supported by the USOE Office of Career Education. In these four areas, we believe that our coverage has been comprehensive.

From the large remainder of the body of career education literature that appeared from 1973 through 1978, we have selected and cited a sampling of items which, we hope, are representative of the body as a whole. A further limitation that we have imposed upon ourselves has been to cite only items which have been processed by the Educational Resources Information Center (ERIC) and which are available to the public through the nationwide ERIC System. This avoids the problems and frustrations of "fugitive documents" and out-of-print publications and insures that all of the items cited in the bibliography are readily available to users. We have provided, at the beginning of the bibliography, information on the accessibility of the items cited and on the procedures for using the ERIC System.

It is our hope that this new 1979 Bibliography on Career Education, like its 1973 predecessor, will be useful to persons interested in familiarizing themselves with the career education concept and with some of the techniques, practices, and materials for the implementation of career education.

Linda Hall
Sidney C. High, Jr.

ACCESSIBILITY OF THE ITEMS CITED IN THIS BIBLIOGRAPHY

All of the items in this bibliography have been processed by the Educational Resources Information Center (ERIC) and are available to the public through the nationwide ERIC System. This means that the items are available at more than 600 locations across the country, in ERIC Collections maintained by State Departments of Education, colleges, universities, and other organizations. The ERIC System produces a directory listing the location, telephone number, contact person, and access hours of each of the ERIC Collections. The directory, which is entitled Directory of ERIC Microfiche Collections, is available from the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Bethesda, Maryland 20014 (telephone number: 301-656-9723). By referring to the directory, a user can determine the location of an ERIC Collection in his or her locality. The user then needs only to cite the "ED" number of the document desired and it can be retrieved from the ERIC Collection.

Individuals who do not have ready access to a nearby ERIC Collection, or who wish to have their own copy of a particular document, can place direct orders for ERIC documents from the ERIC Document Reproduction Service. The most economical way to procure reproduced copies of ERIC documents is in microfiche form. A microfiche reproduction of an ERIC document can be purchased for 83¢, plus 15¢ postage. (For a document of more than 480 pages, the price is somewhat higher.) Of course, special microfiche viewing equipment is needed to enlarge the images for reading.

For those who prefer, it is possible to obtain a full-size hard-copy reproduction of an ERIC document. The price for a hard-copy reproduction varies, depending on the number of pages of the particular document being ordered. The prices range from $1.82 (plus postage) for a 25-page document to $6.32 (plus postage) for a 100-page document.

Orders for either microfiche or hard-copy reproductions of ERIC documents should be addressed to the ERIC Document Reproduction Service, P.O. Box 190, Arlington, Virginia 22210. An order should specify the "ED" number of the document desired, should state whether a microfiche or a hard-copy reproduction is wanted, and should include a check, money order, or official purchase order.
